The sanitary condition of the city and port is satisfactory; no quarantinable disease reported.

*Reports from Habana—Inspection of vessels—House and water-deposit inspection.*

Passed Assistant Surgeon Amesse reports, October 19 and 25:

*Week ended October 16.*

Bills of health issued.....	19
Vessels inspected.....	17
Members of crews of outgoing vessels inspected.....	806
Passengers of outgoing vessels inspected.....	275

For the first ten-day period of October, the local inspectors report 17,889 premises inspected and 16,982 possible breeding places for mosquitoes petrolled; 42,000 cans were removed; 20,920 linear meters of ditching cleaned and 132 square meters of public land cleared of vegetation.

In this work, 55 deposits of mosquito larvæ were encountered of which but 15 proved to be collections of *Stegomyia*.

*Week ended October 23.*

Bills of health issued.....	19
Vessels inspected.....	15
Crews of outgoing vessels inspected.....	639
Passengers of outgoing vessels inspected.....	295

For the ten-day period ending October 20, there were 19,063 houses inspected, in which 29 deposits of larvæ were found. Of these collections, but 16 showed larvæ of *Stegomyia*.

In addition, 12,251 possible breeding places were petrolled; 46,000 cans removed from premises and 16,000 linear meters of ditching cleared.
